VIVEKANANDA COLLEGE OF ENGINEERING & TECHNOLOGY

[A Unit of Vivekananda Vidyavardhaka Sangha Puttur (R)]

Affiliated to Visvesvaraya Technological University and Approved by AICTE New Delhi & Govt. of Karnataka

Nehru Nagar, Puttur - 574203, DK, Karnataka, India

DEPARTMENT OF ARTIFICIAL INTELLIGENCE & MACHINE LEARNING

CERTIFICATE

Certified that the project work entitled “**Medical Management System**” is carried out by **SHREESHA B** bearing USN **4VP20AI027** bonafide student of **Vivekananda College of Engineering & Technology, Puttur** in partial fulfilment for the award of **Bachelor of Engineering** in **Artificial Intelligence & Machine Learning** of the **Visvesvaraya Technological University, Belagavi** during the year 2022-23. It is certified that all corrections/suggestions indicated during Internal Assessment have been incorporated in the report deposited in the departmental library.

The project report has been approved as it satisfies the academic requirements in respect of Project work prescribed for the said Degree.

ACKNOWLEDGEMENT

I take this opportunity to express our deep heartfelt gratitude to all those people who have helped us in the successful completion of the project.

First and foremost, I would like to express our sincere gratitude to our guides, **Prof. Pradeep Kumar K G, Prof. Shwetha CH** for providing excellent guidance, encouragement and inspiration throughout the project work. Without their invaluable guidance, this work would never have been a successful one

I would like to express my sincere gratitude to our Head of the Department of Artificial Intelligence & Machine Learning, **Dr. Govindaraj P** for his guidance and inspiration.

I would like to thank our Principal, **Dr. Mahesh Prasanna K** for providing all the facilities and a proper environment to work in the college campus.

I am thankful to all the teaching and non-teaching staff members of Artificial Intelligence & Machine Learning Department and Computer Science & Engineering Department for their help and needed support rendered throughout the project.

DECLARATION

I, **SHREESHA B (4VP20AI027)** student of fifth semester B. E. in Artificial Intelligence & Machine Learning, **Vivekananda College of Engineering & Technology, Puttur**, hereby declare that the project work entitled “**Medical Management System**” has been carried out and duly executed by us at VCET, Puttur, under the guidance of **Prof. Pradeep Kumar K G** and **Prof. Shwetha C H** Assistant Professors, Department of Computer Science & Engineering, Vivekananda College of Engineering & Technology, Puttur, and submitted in partial fulfillment of the requirements for the award of degree in **Bachelor of Engineering in Artificial Intelligence & Machine Learning**, by **Visvesvaraya Technological University**, Belagavi during the academic year 2022-2023.

ABSTRACT

For a medical management company like a pharmacy, this project aims to develop and implement a comprehensive database management system. The system will allow for the management and tracking of data regarding patients, medical staff, equipment and drug inventories, appointments, sales, and medical procedure orders.

By centralizing data storage and offering a user-friendly interface for accessing and modifying that data, this project seeks to increase the efficiency and accuracy of the medical management organization's activities.

The system's capacity for tracking and managing inventory both of equipment and medications is one of its essential components. Medical staff will be able to submit purchase orders with suppliers, check the availability of pharmaceuticals and equipment, and track the delivery and reception of things with the help of the system.

Additionally, the system will automatically update the inventory levels as things are used or expire, giving the medical management organization real-time visibility into its stock.

Another important component of the system is the capacity to store and manage patient and staff information, such as medical history, contact information. The system also has a feature that manages the appointments and keeps track of the medicines that are assigned to the patients.

The system will be designed to be user-friendly and intuitive, with a graphical user interface that allows medical staff to easily access and manipulate the data. The system will also be designed to be secure, with role-based access control to ensure that only authorized staff can access sensitive information.

The overall goal of this project is to provide a thorough and effective system for overseeing a medical management organization's everyday activity. The system will enhance the accuracy and efficiency of the medical management organization's operations by centralizing data storage and offering a user-friendly interface, ultimately leading to improved patient safety and increased business outcomes.

Table of Contents

1. Introduction	1
1.1 Introduction to Database Management System	1
1.2 Applications of DBMS	2
1.3 Introduction to MySQL	3
1.4 MySQL Command Syntax	3
2. Analysis and Requirement Specification	8
2.1 Purpose of this project	8
2.2 Scope of this project	8
2.3 Functional Requirements	8
2.4 Non-Functional Requirements	9
2.4.1 Hardware specification	9
2.4.2 Software specification	9
2.5 Summary of analysis and requirement specification	10
3. Design	11
3.1 ER Diagram	11
3.2 Schema Diagram	12
4. Implementation	13
4.1 Implementation of Table Creation	13
4.2 Implementation of Insertion data & alter table	17
4.3 Implementing Initial Testing	20
4.4 Retrieving table, updating & deleting records	21
4.5 Implementation of Views	24
4.6 Implementation of Triggers	24
4.7 Implementation of Stored Procedures	28
5. Snapshots	29
5.1 Screen shots	29
6. Conclusion	34
7. References	35

List of Figures

Fig. No.	Description	Page No
3.1	ER Diagram	11
3.2	Schema Diagram	12
5.1	Administrator Login i.e., security	29
5.2	Administrator Dashboard	30
5.3	Employee Dashboard with restricted options	31
5.4	Employee can only view other employee cannot edit their details	32
5.5	Administrator can Add Suppliers details	32
5.6	Low stock medicines and be seen and search through medicines	32
5.7	Can View soon to be expired medicine & expired	33
5.8	Get between dates transactions report	33
